## FarlaCare

An innovative approach to wound care allowing you to quickly deliver the right dressing to improve patient and resident outcomes.

### FarlaFOAM.S Silicone Foam

- Multi-layered highly absorbent adhesive dressing
- Perforated soft silicone wound contact layer for gentle wound management
- The silicone adhesive does not adhere to the wound therefore the dressing may be removed without pain or trauma
- Provides an effective barrier to bacteria as well as helping to prevent fluid and bacterial strike through
- The highly breathable top film helps to minimize the risk of maceration to the wound and peri-wound
- Flexible and conforms well to body contours
- Flexi-fit size available which combines the same high-absorbency and secure self-adhesion in an anatomically shaped dressing
- Can be used under a compression bandage
- Can be worn for up to 7 days
- Pack of 5

### FarlaSORB Super Absorbent

- Excellent absorption capacity for use on heavily exuding wounds
- Multi-layered construction designed to facilitate fluid management and promote faster healing
- High capacity exudate management minimises risk of maceration
- Traps wound fluid and locks components away
- Can be used under compression therapy
- Pack of 5

|               |           |

## FarlaFIBRE Gelling Fibre Dressing

- Highly absorbent perfectly balanced absorbency and wet strength for use on moderate to highly exuding wounds
- Rapidly swells to form a transparent gel, preventing leakage and maceration
- Contours to the wound bed to minimise dead space where bacteria can live
- High wet strength helps facilitate one-piece dressing removal
- Flexible dressing with anti-shrinkage property, fills deep and cavity wounds.
- Maintains an optimal moist healing environment
- Pack of 5

|               |                   |
